

Solution Capability

dataglobal Digital Workplace

A paperless office in no time

With dataglobal Clients, integrating, connecting, finding and sharing information quickly from the digital workplace is like child's play – teamwork at its best!

dataglobal Clients provide access to your digital workplace. You can

- integrate data manually
- connect data for folders, files and processes
- show data in dynamic hierarchies
- find relevant information quickly and reliably and
- generate intuitive workflows and digital processes.

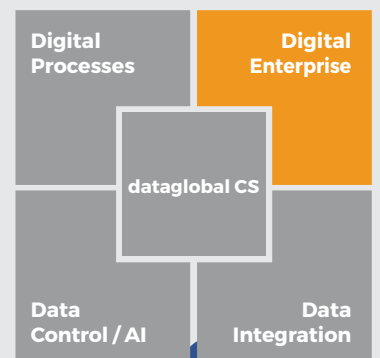

Flexible access to all company data and applications

Depending on the application, you always have the right access. Whether web-based, mobile, on the desktop, as an Office add-in or as a portal – our clients are distinguished by the highest level of functionality, simple operation and intuitive user interfaces. This allows data to be easily integrated, managed and shared, including manually by drag-and-drop and via a scanner for paper documents.

With automatic and manual indexing and tagging, you link the information in the business context.

Absolute transparency: dataglobal clients create access to all company data and applications for seamless content services. With just a few clicks, you can integrate your various systems, e.g. intranets, employee portals, customer and supplier portals, model corporate-wide workflows and combine them in web applications and portals.

Whether it be information systems, contract management or access to a digital personnel file: the possibilities for application are virtually limitless. Even processes, such as processing data, requesting services or monitoring deadlines, are examples of typical applications.

Digital workplace platform for your digital transformation

"Faster access and sharing valuable information rapidly – anytime, anywhere – that improves your team's productivity."

Digital transformation guarantees tangible competitive advantages

Thanks to its seamless integration with Microsoft Office, users of products such as Word, Excel, PowerPoint, Outlook, etc. can interactively and directly access the digital workplace and version, file, search, retrieve and directly share documents.

dataglobal clients can also be integrated into other business applications, such as SAP, CRM and e-mail clients, meaning all the relevant

information can be used seamlessly across the company. For the first time ever, users have the freedom to decide which information they want to access and at what point during the work process.

They enjoy the freedom of being able to capture and file documents, such as expense receipts, delivery notes, invoices, receipts, etc from anywhere, even on the go, to manage files or to quickly and reliably find information in the archive. The information advantage is on your side!

The added values at a glance

- › Thanks to its seamless integration with Microsoft Office, users of products such as Word, Excel, PowerPoint, Outlook, etc. can access the digital workplace interactively and directly.
- › Documents can be versioned, filed, searched, retrieved, and shared directly.
- › dataglobal clients can be integrated into different business applications. So you can seamlessly leverage important information across the enterprise.
- › Your big advantage: You decide at which point in the work process you want to access which information.
- › This allows you to capture and store documents at any time - even on the go. It doesn't matter if they are expense documents, delivery notes, invoices or receipts.
- › The required information is retrieved quickly and reliably from your archive. Benefits of information at your fingertips.
