dataglobal File Management

Automated and centralized management of your data

Classify, connect and centrally manage unstructured data: dataglobal file and SharePoint management is the clever solution for automated outsourcing and revision-proof archiving.

With professional file management you can manage and archive your corporate-wide dataset on
• Windows servers
• Filers
• Network shares
• in SharePoint and SharePoint online

Heterogeneous and distributed files are easily mastered with central rules.

All data remains fully accessible to the user, even on the go.

Gaining information from unstructured data

Relevant information can be found quickly and securely in the digital workplace. With the smart classification, you understand your data and exploit its full value. Your data becomes an important resource for content services.
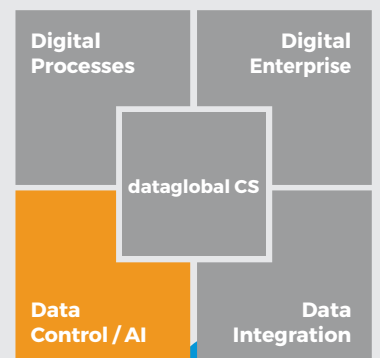

In the business context-related information from SharePoint, file stores and many other systems can be connected. This allows you to generate business workflows that give you a real competitive advantage.

Ensure compliance and ease the burden on IT

With dataglobal File Management, you can meet your compliance requirements while leveraging your entire dataset as a valuable resource for your digital transformation.

The advantage for your IT infrastructure is the streamlining of expensive online file storage. They create space for new items while retaining access to the entire dataset.
